Public Safety and Community Services Building

CEQA – Categorically Exempt

The design presented to you of the Public Safety and Community Services Building was reviewed by Grassetti Environmental Consulting. After review of the project, GES determined that the PSCS is categorically exempt from the CEQA based on the following:

- CEQA Guidelines Section 15303, permitting New Construction or Conversion of Small Structures, which identifies exemption for construction limited numbers of new, small facilities or structures, not exceed 10,000 sq. ft. in urbanized areas on sites zoned for such uses. This project involves the construction of a 9,406 sq. ft. new building on a mostly paved site on the WVC campus, and which is zoned for the proposed use.
- Within the site of the PSCS there is an old oak tree that will have to be removed. The district had an arborist review the tree and advised that based on the criteria for the type of tree we would be able to remove the tree if desired.
- Grassetti Environmental Consulting helped draft the resolution presented tonight, and staff recommends that the BOT approve the resolution.

Thank You
