Project Description:

This project will renovate and repurpose the existing Science & Technology building (32,125 GSF). With construction of the future STEM Center, the existing Science & Technology building will be vacated and inactivated. This project will repurpose the existing Science building to a college support facility with multiple flexible uses. Scope of work will include upgrades and/or replacement of the following systems: roof, HVAC, lighting, flooring, ceiling, data/telecommunication, electrical, seismic work, accessibility (ADA), and interior reconstruction.

Master Plan Comments:

Repurposing the Science and Tech Complex building will enable the College to better serve students. The proposed project will reconfigure building interiors to become more flexible in space usage and campus needs. This is a future project in the College's Master Plan that will allow existing buildings to be used in future areas needs without the need to remove or add more buildings.
