Project Description:

This project will renovate the existing Telecommunications (TAV) building. Scope of work may include, but not be limited to, upgrades and/or replacement of the following systems: roof, HVAC, lighting, flooring, ceiling, data/telecommunication, electrical, seismic work, accessibility (ADA), and interior remodeling to meet the program requirements of the College. Renovation of the building will allow for reconfiguration and repurposing of existing space to better meet institutional needs. The existing Telecommunications building was built in 1999 and is in need of major updates to infrastructure and instructional space.

Master Plan Comments:

Per the Mission College Master Plan, the evolution of instructional methods and technology has created the need to modify existing space (classrooms, laboratories, and offices) and modernize telecommunications and distance-learning capabilities. Such modifications will entail continued updates to the College's electrical and telecommunications infrastructure. Renovating the Telecommunications building will allow Mission College to attain these goals.
