District Report for West Valley-Mission Community College District (490)

FUSION

Inventory of Land

Planning

West Valley-Mission Community College District (490)

List the address and acreage of every land unit owned by the district (Education Code 81821 ((b)3)). Please identify all locations, both on-campus and off-campus, grouped according to their "parent" institution. In the event the list is long or complicated, please substitute copies of college bulletins or other notices to the public which display similar information. The list should be current as of October the prior year.

Address	Acres
Mission College	163

Estimated Cost	\$0	\$823,000	\$658,000	\$19,483,000	\$536,000	

Explain why this project is needed:

The MT Portables at Mission College were installed as a temporary solution to the growing needs of the College for additional instructional and office space. The first portables were installed in 1979 with more installed in 1999. The portables have been heavily utilized and are now approaching the end of their life cycle. Currently, general classrooms, faculty offices, music labs and electronic labs occupy 24,021 ASF in multiple portables. This project will consolidate the various portables buildings into one new building. The proposed replacement of the MT Portables for music and electronic/computer labs will provide a building to keep up with the pace of changing equipment and technology, to allow instructional efficiency and enhance the instructional delivery system. This project will improve instructional space and promote interaction within new buildings by consolidating space which currently dispersed throughout separate portable buildings. This project is part of the College's Master Plan and will be included in the Five-Year Construction Plan.

Project Intent & Scope

Planning

West Valley-Mission Community College District (490)
Mission College (492)

District Priority & Project: 3 Performing Arts Building

Project Type: New
Total Estimated Cost: \$30,571,000
Anticipated Source(s) of Funds: State and Non-State
Type of Construction:
Seismic Retrofit:
If Existing - Age:
If Existing - Condition:

Anticipated Time Schedule

	Land Acquisition	Preliminary Plans	Working Drawings	Construction	Equipment	Occupancy
Year	0	2020	2020	2022	2022	2023-24
Estimated Cost	\$0	\$1,147,000	\$900,000	\$26,781,000	\$1,743,000	

Explain why this project is needed:

This project will construct a new building to provide a performance arts facility to promote a complete campus concept. The Dance and Music departments are currently held in the Main Building. This building does not have the proper instructional and performance space for these types of programs such as size of classrooms and laboratories, acoustics, and rehearsal space . These programs currently have to set up and take down seating and equipment for their classes and performances in the Main Building or outside which takes time away from instruction and disturbs other programs within the building and on campus. The new Performing Arts Building will seat a maximum of 400 persons in the 22,000 square foot facility and will include special amenities such as a stage, lighting, acoustics, and space arrangements. This new facility would support rehearsals, performances as well as student and college programs. It will be located and connected to the southeast portion of the MT Replacement building as described in the College's Master Plan.

Estimated Cost	\$0	\$2,613,835	\$2,441,552	\$65,208,533	\$2,212,105	

Explain why this project is needed:

Mission College requests \$56,943,000 for the proposed affordable student housing complex. The anticipated total project cost is \$81,943,000 (escalated to midpoint of construction). The College is proposing 100% of this development for low-income students, and therefore, the entire complex is anticipated to be State-Supportable. The College proposes to contribute \$25,000,000 to this project from available on-hand cash, which is approximately 30.51% of total project costs while requesting 69.49% (\$56,943,000) of total project cost as State Funding. Total project cost includes completion of design documents, DSA plan check fees, legal/specialty services, permits/fees, project management, and construction. The proposed project will construct a new affordable student housing complex at West Valley-Mission Community College District's (WVMCCD) Mission College. The new student housing complex will have the capacity to house 304 low-income students and will be approximately 43,247 Assignable Square Feet (ASF) / 64,050 Gross Square Feet (GSF). The complex is expected to be located south of the Central Plaza on a flat and open undeveloped site that was previously planned for parking. This location is ideal due to its proximity to amenities, transit, utilities, and the center of campus. The proposed housing complex is anticipated to be a four-story building that includes: 1 unit – Resident Director Apartment (950-Apartment), 8 units – 2 bedrooms, quad occupancy Apartment (950-Apartment), 26 units - single occupancy (910-Sleep/Study without Toilet/Bath), and 123 units - double occupancy (910-Sleep/Study without Toilet/Bath). Common areas on each floor include toilet/bath, along with the following ancillary/student support service spaces: counseling office, veterans services office and support space, basic needs center, shared kitchens, laundry rooms, lounges, and ample study spaces. The ancillary/student support service spaces are specifically intended to support the basic needs and academic success of participating low-income students. The primary goals of the proposed student housing project are to support student success by providing cost-effective housing for students and address students' essential physiological needs. By providing low-cost student housing and ancillary/student support service spaces, Mission College is looking to increase enrollment, Full Time Equivalent Students (FTES) and retention rates. The College also aims to improve student engagement to cultivate diversity, inclusion and belonging on campus. Per WVMCCD's Vision for Campus Housing Initiative, "the District is envisioning a strategic initiative that has the potential to enrich the educational, cultural, and civic fabric of the community." Closing the equity gap will provide a holistic approach to student learning, which is a primary goal of the College's Student Equity Plan. Based on the California Department of Housing and Community Development's May 2022 Memorandum for State Income Limits for 2022, Santa Clara County's Area Median Income (AMI) for a single-room occupancy unit type was \$117,950. For this Affordable Student Housing Grant Program, the maximum per bed rental rate that Mission College could charge for monthly rent would be \$1,474 per bed ($30\% \times 50\% \times \$117,950 = \$17,693$ annual rent / 12 months = \$1,474 monthly rent). The College plans to offer its traditional single occupancy units at \$958 per bed, traditional double occupancy units at \$737 per bed, and 2-bedroom, quad occupancy apartment units at \$840 per bed to low-income students. The 1 unit – Resident Director Apartment will be included as employee compensation, and therefore, will not generate revenue. The College is committed to first offering housing to low-income students at an average rental rate of \$764 per bed, which is approximately 48% below the \$1,474 monthly rent per bed maximum. As of July 2023, Mission College has defined strategic objectives and completed a Student Housing Market Demand and Feasibility Analysis, financial analysis, site evaluations and pre-schematic building design efforts. Next steps for the proposed project will be to finish design documents, obtain Division of State Architect (DSA) approval, and start construction. Completing the design process is anticipated to take approximately 7 months and could be completed as early as January 2024. Following completion of construction documents, DSA review and approval of plans is anticipated to take approximately 8 months. Given the anticipated time schedule, the proposed project could be ready for construction groundbreaking as early as December 2024. The College is committed to requiring low-income students renting the proposed housing facility to enroll in a minimum average of 12 degree-applicable units per semester-term (or quarterly-term equivalent) to facilitate timely degree completion. The minimum unit load requirement may be temporarily reduced if the College deems a student demonstrates an exceptional circumstance. Eligible low-income students renting the proposed facility will be permitted to live in the building for the full academic or calendar year, so long as the student remains enrolled

Explain why this project is needed:

This project will build a new building dedicated to Science, Technology, Engineering, and Mathematics (STEM). Scope of work includes new building construction, associated site work, and a new Science Garden surrounding the facility. The new building will foster the study of STEM and provide students with collaborative space for study groups and tutoring. The existing Science building at Mission College is not large enough to support expansion of the new STEM Center. This project will provide a facility to promote the new STEM-Core concept at Mission College. Space within the existing Science and Technology Complex will be inactivated as a secondary effect of this project.

Estimated Cost	\$0	\$1,490,443	\$1,387,227	\$29,423,363	\$1,005,281	

Explain why this project is needed:

Mission College's Campus Center building was constructed in 1999 and has had no major renovations since its original construction. The proposed project will renovate the existing Campus Center, which encompasses 39,421 of Gross Square Feet (GSF) and 24,626 of Assignable Square Feet (ASF). The existing Campus Center houses the campus cafeteria/dining facilities, bookstore, meeting rooms, student services offices, and campus parking/police functions. Renovation of the building will upgrade infrastructure systems, provide for a more comprehensive approach to student life, and improve safety/security and dining services. Scope of work will include, but not limited to, the replacement of the following systems: roof, HVAC, plumbing, data/ telecommunication, and electrical. The project will also include (ADA) accessibility improvements, mandatory seismic rehabilitation, and interior reconfiguration and repurposing. Functional space within the renovated building will include 2,687 ASF of Office, 6,591 ASF of Food Service, 6,189 ASF of Lounge, 2,080 ASF of Bookstore, and 7,079 ASF of Other support space. Total project cost is estimated to be \$33,306,314 (per Construction Cost Index (CCI) 9654) and is not escalated to the mid-point of construction. The State Capital Outlay system considers the proposed project as a Category M project, modernization of institutional support space.

Explain why this project is needed:

This project will renovate the existing Gymnasium and Partial PE Phase II buildings (21,574 ASF). Scope of work will include upgrades and/or replacement of the following systems: roof, HVAC, lighting, flooring, ceiling, data/telecommunication, electrical, seismic work, accessibility (ADA), and interior reconstruction. Renovation of the building will allow for reconfiguration and repurposing of existing space to better meet institutional needs.

Explain why this project is needed:

This project will renovate the existing Telecommunications (TAV) building. Scope of work may include, but not be limited to, upgrades and/or replacement of the following systems: roof, HVAC, lighting, flooring, ceiling, data/telecommunication, electrical, seismic work, accessibility (ADA), and interior remodeling to meet the program requirements of the College. Renovation of the building will allow for reconfiguration and repurposing of existing space to better meet institutional needs. The existing Telecommunications building was built in 1999 and is in need of major updates to infrastructure and instructional space.

Explain why this project is needed:

This project will provide roadway and pedestrian walk work to improve campus circulation and provide code-related emergency vehicle access throughout the campus. Scope of work includes (1) repair and resurfacing of student/staff parking lots, and (2) new signage work to provide improved wayfinding for both pedestrians and vehicular traffic throughout the campus. Preliminary plans will start in 2019/2020 for Phase I of this project, which includes Master Planning and programming of signage/wayfinding needs. Working Drawings, Construction, and occupancy year are based on future phases that will occur as the signage/wayfinding master plan is implemented.

Project Intent & Scope

Planning

West Valley-Mission Community College District (490)

West Valley College (493)

District Priority & Project: 2 Learning Resource Center Renovation

Project Type: Reconstruction
Total Estimated Cost: \$37,009,000
Anticipated Source(s) of Funds: State and Non-State
Type of Construction:
Seismic Retrofit:
If Existing - Age:
If Existing - Condition:

Anticipated Time Schedule

	Land Acquisition	Preliminary Plans	Working Drawings	Construction	Equipment	Occupancy
Year	0	2019	2019	2021	2022	2023-24
Estimated Cost	\$0	\$1,832,000	\$1,414,000	\$33,219,000	\$544,000	

Explain why this project is needed:

This project proposes to reconstruct West Valley College's 46 year old Learning Resource Center (LRC) to modernize instructional space and improve service delivery. The LRC, originally constructed in 1972, encompasses 59,134 Gross Square Feet (GSF) and 48,265 Assignable Square Feet (ASF). The LRC supports various programs and services, including, the Digital Media Center, TV/Recording Studio, Writing Center, Library, Tutorial/Assessment Center, English as a Second Language (ESL), Graphics, Printing Shop, and the Disability and Educational Support Program (DESP). The LRC is functionally and physically inadequate and unable to accommodate current needs. The inefficient use of space adjacencies and antiquated technology within the building impedes West Valley College's ability to reach instructional goals and the ability of students to study and perform research. The proposed project would alleviate problems within the current building by reconstructing the existing facility to meet programmatic needs. The reconstruction effort will improve functional adjacencies, promote sharing of resources, and upgrade technology and building systems while not changing the overall building footprint.

Estimated Cost	\$0	\$295,034	\$1,947,223	\$20,121,302	\$1,239,141	

Explain why this project is needed:

This project will replace the Music space from within the existing Humanities/Fine Arts/Performing Arts Building Complex built in 1973. Existing spaces do not allow adequate implementation of the College's instructional goals. The spaces have numerous functional and physical deficiencies and do not meet programmatic needs. The project will construct a new Fine Arts and Music Building to house individual practice, traditional music laboratory, digital music, recital, and recording studio. The Performing Arts Building Rooms 1-24B will be demolished to provide a site for the new building footprint.

Estimated Cost	\$0	\$220,453	\$1,454,995	\$15,034,946	\$925,906	

Explain why this project is needed:

This proposed project will reconstruct Buildings C and D within the existing Physical Education Complex at West Valley College. Buildings C and D encompasses 37,187 of Gross Square Feet (GSF) and 28,634 of Assignable Square Feet (ASF). Since its original construction in 1974, there have been no major renovations to the Physical Education Complex. Buildings C and D of the Physical Education Complex are located west of Buildings A and B, and north of the multi-purpose track and field. Buildings C and D currently house the main gymnasium, an auxiliary gymnasium, weight room, cardio room, dance studio, athletic storage/support, and faculty office space. The reconstruction of Buildings C and D will improve existing space through programming efficient adjacencies, increase athletic storage space, restore the practice gymnasium and main gymnasium functionality, and upgrade the existing infrastructure and building systems. Improvements to these facilities will improve the quality of athletic facilities on campus. Upgrades and/or replacement of the following systems will be included in the scope of work: roof, HVAC, lighting, flooring, ceiling, data/telecommunication, electrical, accessibility (ADA), and interior renovations. The proposed project also includes mandatory seismic rehabilitation of the existing buildings.

Estimated Cost	\$0	\$457,468	\$270,060	\$5,243,073	\$169,411	

Explain why this project is needed:

This project proposes to construct a new Child Development Center at West Valley College. The new building would replace current functions in the existing Childcare Portables 1 and 2. The existing Childcare Portable 1 was originally built in 1967 with a minor renovation in 1976. The Childcare Portable 2 was built in 1999 with no renovations since then. The proposed facility will total approximately 3,863 Assignable Square Feet (ASF) and approximately 6,438 Gross Square Feet (GSF). Assignable space within the building will include 180 ASF of Office and 3,683 ASF of Other Support Space. Other Support Space includes 1,820 ASF of Demonstration (Child Care) Space and 1,863 Demonstration Service Space. Total project cost is estimated at \$6,140,012 (Per Construction Cost Index (CCI) 9654 and is not escalated to mid-point of construction). State supportable project costs are proposed to be split 50:50 between the District and State. Non-State Supportable components of the project will be fully funded by the District using local capital construction bond funds. The State Capital Outlay system considers the proposed project as a Category M project, for modernization of instructional and institutional support space.

Explain why this project is needed:
This project will construct an expansion for instructional space related to Science Technology Engineering and Mathematics (STEM) program functions. The building will be located adjacent to the existing Science building and provide additional instructional space needed to develop new and emerging programs at the College. The proposed building will be approximately 10,000 GSF and include classroom and laboratory space for STEM related programs.

Estimated Cost	\$0	\$403,970	\$462,657	\$8,840,055	\$303,849	

Explain why this project is needed:

This project will repurpose the District Office's Administration Building (Bldg. #1) for West Valley College faculty/staff offices and training/staff development support spaces. This building was built in 1973, and the current functions within the building include District Administrative offices and other District functions. This building was originally a part of WVC's space inventory, however, was updated to the District Office campus as of 2022/23 space inventory due to District level usage. The District has outgrown this 6,835ASF/10,000GSF building and is planning on building a New Administration Building of larger size to support the growth and future needs of the District. Once the New Administration Building is occupied, the Administration Building (Bldg. #1) will be repurposed for WVC faculty and staff, and will include office, office service, lounge and meeting spaces.

Explain why this project is needed:

This project will restore all of West Valley College landscape areas impacted by construction occurring over the next several years. This project will help complete the campus and restore landscaping in order to provide for an effective student learning environment. Scope of work will include upgrades to entry points at parking lots and create new gateways for ease of access to students and visitors. In order to minimize institutional disruption, this project will take place over the course of 4 phases. Phase 1 had occurred and was completed during the 2021/2022 fiscal year. Phase 2 will begin in 2022/2023 and is expected to be completed by 2024/2025. Phase 3 will begin in 2025/2026 and is estimated to be completed by 2027/2028. The final phase of this project (Phase 4) will occur between the 2028/2029 and 2030/2031 fiscal years.

Project Intent & Scope

Planning

West Valley-Mission Community College District (490)
West Valley College (493)

District Priority & Project: 34 Child Care P2 Repurposing

Project Type: Reconstruction
Total Estimated Cost: \$2,500,000
Anticipated Source(s) of Funds: Non-State
Type of Construction:
Seismic Retrofit:
If Existing - Age:
If Existing - Condition:

Anticipated Time Schedule

	Land Acquisition	Preliminary Plans	Working Drawings	Construction	Equipment	Occupancy
Year	0	2028	2028	2030	2030	2030-31
Estimated Cost	\$0	\$31,250	\$206,250	\$2,131,250	\$131,250	

Explain why this project is needed:

The Child Care P2 building was originally built in 1999 and although not deteriorating, the building is in need of a refresh that includes a better use of spaces and space usage specific to program development and student success. Currently, the CDC program does not have enough office spaces for classified workers and student workers. Teacher/student mentorship is limited due to the lack of office spaces and private spaces away from child care functions. Repurpose of spaces within this building will immediately follow the occupancy of the new permanent Child Development Center building. This building will be repurposed into predominately Office space with some Lounge and Storage space to support the Child Development Program.

Estimated Cost	\$0	\$48,938	\$322,988	\$3,543,074	\$0	

Explain why this project is needed:

This project will provide a campus-wide path of travel transition plan that will address ADA accessibility issues at both Mission and West Valley Colleges. Based on this transition plan, projects at both Colleges will be implemented to remove accessibility/ADA barriers. In order to decrease instructional, athletic, and student services disruptions across both colleges, this project will take place over the course of 3 phases for each college. The project will occur over 3 phases at each College. Phase 1 ADA improvements has occurred and was completed in 2020-21, Phase 2 is estimated to be completed by 2023-24, and Phase 3 will be completed by 2026-27.

Estimated Cost	\$0	\$122,315	\$807,279	\$8,341,879	\$513,723	

Explain why this project is needed:

This project will construct a new District Administration building at West Valley College. The existing Administration Building that was originally built in 1973 and is one of the oldest on the campus. The existing Administration building is only 6,835 ASF and no longer meets the needs of District services and administration. The new building will house the District Board room, Chancellor's/Vice Chancellor's offices, office of advancement, fiscal services, and human resources functions. The existing Administration building will then be renovated for campus administration/faculty and staff use as a separate capital construction project.

Explain why this project is needed:

This project will replace existing HVAC, Energy Management Systems, and Lighting Systems with new energy saving and sustainable systems. Upgrades will occur at both campus locations. In order to decrease instructional, athletic, and student services disruptions across both colleges, this project will take place over the course of 2 phases for each college. Phase 1 is expected to start in 2024-25 and be completed by 2027-28. Phase 2 will start in 2027-28 and be completed by 2030-31.
